- Features "Secure Erase": Fully erase the USB device without the data being recovered.
- No Warm-up or Cool-Down Necessary.
- Supports Synchronous and Asynchronous Copy Modes.
- Real-time Display of Detailed Information on LCD Screen.

TEAC's new USB flash duplicators will copy, compare and erase up to 15 USB flash drives simultaneously. All functions are selectable via the duplicator controller with an LCD display, making it easier to control.

More and more USB flash drives are used to distribute content or product information at presentations, to customers, internally within the organization or for photos, data, files, videos or music. TEAC's flash duplicators are fast and easy to operate. Advanced asynchronous duplication means no waiting and no interruption as each channel can independently load, unload, and copy.

Before the TEAC's line of USB flash duplicators were available, the only solution for flash duplication was to purchase complicated, expensive and slow industrial duplication machines. With the introduction of the TEAC flash duplicators, now the process is easy and inexpensive!

Now it is affordable and practical for anyone to duplicate Large numbers of USB flash drives for any application from Government use, to education to house of worship to Corporations (Marketing, Engineering, etc.) or individual home and office uses.
